

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1. (Canceled)

Claim 2. (Currently amended) A The casing according to claim 48, wherein the positioning means are arranged at a longitudinal end of the bottom part, comprise at least one abutment extending up to the opening nearest to the abutment in order to abut against a cavity of the blister package, and further comprise a recess formed to accommodate an end region of the blister package extending between the first cavity and the end of the blister package.

Claim 3. (Currently amended) A The casing according to claim 48, wherein the bottom part comprises retaining and guiding means for holding the blister package down on the bottom and for properly arranging the blister package on the bottom with regard to its lateral position.

Claim 4. (Currently amended) A The casing according to claim 48, further comprising a cover for closing the bottom part, such that a blister package properly arranged on the bottom part cannot be removed from the casing in the closed state.

Claim 5. (Currently amended) A The casing according to claim 4, wherein the cover is pivotally attached to the bottom part, such that the cover can be pivoted in a plane parallel to the bottom part.

Claim 6. (Currently amended) A The casing according to claim 5, comprising an axle for pivotal attachment of the cover to the bottom part.

Claim 7. (Currently amended) A The casing according to claim 48, wherein the bottom part has stepped engaging means for supporting a blister package after being properly arranged on the bottom part, the stepped engaging means being arranged at that end of the bottom part opposite the positioning means.

Claim 8. (New) A casing for a blister package wherein the casing has a bottom part and the bottom part has a plurality of openings therein,

wherein the bottom part has positioning means and the positioning means are shaped and arranged such that the positioning means are capable of positioning an asymmetric shaped blister

package having cavities such that each cavity of said blister package is centered with one of the openings in the bottom of the bottom part of the case irrespective of which possible way said blister package could be inserted in the bottom part of the casing.
